

Remote Work Puts Your Business at Risk

The move to remote work and increasing use of insecure public cloud apps have been a goldmine for cybercriminals who easily steal login credentials to gain access to your critical data.

So, how do you enable collaborative work from anywhere without putting your business at risk?

Introducing Overwatch SaaS Security

With Overwatch SaaS Security powered by ZTEdge, you can lock down vital software-as-a-service (SaaS) applications while supporting unlimited collaboration with your remote teams.

Overwatch SaaS Security:

- Prevents the use of stolen user credential to access SaaS apps from the public Internet.
- Restricts access to cloud apps only to users logging in via the zero-trust network.
- Blocks employees from using risky cloud applications
- Sanitizes downloads to protect devices from weaponized files
- Limits the ability of users share data on cloud apps

Plus, your SaaS security is managed round the clock from the Overwatch Security Operations Center, giving you the added protection, including:

- 24/7 monitoring by expert analysts
- Real-time threat detection and response
- Continuous policy management

Expert Protection Delivered as a Service

You don't have to be a security expert to deploy Overwatch SaaS Security. We're making it available to businesses of all sizes as a managed service.

✔ Affordable Subscription

Get zero-trust access control over your SaaS apps as a cost-effective expertly managed service.

✔ Easy Deployment

Give employees zero-trust access to their SaaS apps by downloading agents on all internet-enabled user devices.

✔ Fully Managed

We configure, monitor and respond to threats from our 24/7 Security Operations Center (SOC).

Benefits of Overwatch SaaS Security

Overwatch SaaS Security delivers unprecedented control over access to critical cloud apps, including the following benefits.

✔ Credential & App Protection

Our secure access service edge (SASE) framework prevents access to apps and user credentials from the public internet.

✔ Unique, Portable IP Addresses

Unique, personal IP addresses assigned by the Cloud Access Security Broker prevent lateral attacks vectors.

✔ Policy Enforcement

Continuous monitoring enforces user, group, location and/or device-based policies for SaaS applications.

✔ 24/7 Monitoring

Always-on monitoring by our industry-leading SOC analysts enables real-time managed detection and response to threats.

Cybersecurity, Simplified

Overwatch SaaS Security is part of High Wire Networks' Overwatch Open Prevention Suite (OPS). Combined with a managed detection and response platform, Overwatch offers organizations end-to-end protection for networks, data, endpoints and users. With one affordable subscription and a security appliance at every location, you can take advantage of these key features:

- ✔ Security Operations-as-a-Service with Open-XDR
- ✔ Real-time Patch Management
- ✔ Managed Network Detection and Response
- ✔ Multi-factor Authentication
- ✔ Security Awareness Training
- ✔ Video Surveillance-as-a-Service
- ✔ Zero Trust Remote Access
- ✔ Continuous Vulnerability Assessments
- ✔ Managed Firewall

Overwatch also delivers the critical benefits your organization needs:

Integrated, Best-of-breed Solutions	Scalable & Future-proof Architecture	24/7 Protection & Response	Data Sovereignty
Threat Detection, Blocking & Elimination	Continuous Compliance	On-demand Reports & Dashboards	Predictable Costs & No Capital Outlay
