Email Compromise Is on the Rise

Take it from the FBI: Email compromise is a real and rising risk, increasing 65% and raking in $43 billion in the five years ending in 2021. How can you protect against phishing, ransomware, account takeover and other growing and evolving threats to your data-driven business?

Introducing Overwatch Email Security

Overwatch Email Security protects against business email compromise (BEC) and then some, extending protection to your company's vital data-sharing hubs, including:

| ✓ Email & Messaging Protection	✓ Collaboration Protection	✓ File Sharing Protection
Outlook, Teams, Gmail and Slack	Microsoft 365 and GSuite	Dropbox, Box, Google Drive, One Drive and ShareFile

Prevent Threats From Ever Reaching Your Inbox

Our comprehensive email security solution provides proactive data loss protection by combining advanced tools and experienced analysts:
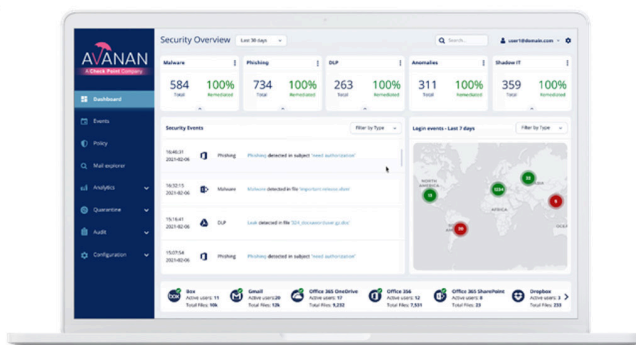

Avanan's Patented AI-driven API-Based Security Platform

Avanan's AI protects cloud email and collaboration suites from threats that evade default and advanced security tools. Its multilayer security detects malicious email-based cyberattacks and prevents them from reaching the inbox.

Overwatch 24/7 SOAR-Powered Security Operations Center

Our SOC is built on an AI-driven Security Orchestration Automation and Response (SOAR) platform, which enriches alerts with threat intelligence, so they're quickly reviewed and remediated by expert security analysts.

Security Built for Cloud Email & Collaboration

Overwatch Email Security is designed and delivered as an affordable managed service for the modern cloud-enabled hybrid workplace. Plus, it can be up and running fast!

Features and Benefits of Overwatch Email Security

Overwatch Email Security protects against evolving threats with AI-driven solutions that learn and adapt to your changing environment.

✓ **Anti-Phishing Software**
To catch advanced attacks, we leverage AI/ML analyzes every aspect of an email, including trusted senders, to identify fraud.

✓ **Anti-Malware and Ransomware**
Our multilayer strategy detects zero-day threats and malicious behavior, quarantining harmful files in real-time.

✓ **Account Takeover Protection**
We use historical ML analysis to identify past breaches, filter false positives and prevent future account takeovers.

✓ **Email Archiving**
Incoming, outgoing and internal emails are easily archived for reference, ensuring business continuity and compliance.

✓ **Smart Data Loss Prevention**
Our platform identifies confidential files, prevents accidental sharing, and limits the ability to print, copy, paste, or screen capture.

Overwatch also delivers the critical benefits your organization needs:

✓ Integrated, Best-of-breed Solutions	✓ Scalable & Future-proof Architecture	✓ 24/7 Protection & Response	✓ Data Sovereignty
✓ Threat Detection, Blocking & Elimination	✓ Continuous Compliance	✓ On-demand Reports & Dashboards	✓ Predictable Costs & No Capital Outlay
