Overwatch Managed NDR

POWERED BY ExtraHop

Your Outsourced Cybersecurity War Room

The core cybersecurity challenge: Limited resources, time and in-house experts to quickly and effectively detect and mitigate advanced threats.

The essential cybersecurity solution: Overwatch Managed Network Detection and Response (NDR) powered by ExtraHop.

Overwatch Managed NDR lets you tap into our cybersecurity war room – a CISO-led 24/7 security operations center (SOC) staffed by security analysts leveraging ExtraHop enterprise-class threat detection and hunting tools.

No capital expenditure	No learning curves	Immediate protection
No new tech	No skill gaps	Round-the-clock response
No SOC buildout	No new hires	Predictable pricing

Eliminate Blind Spots with Full Coverage

We have deep and continuous visibility into east-west and north-south traffic from the data center to the cloud to the user and device edge.

Detect Threats Other Solutions Miss

Our cloud-scale machine learning uses more than 1 million predictive models to detect anomalous and suspicious behaviors as they occur.

Stop & Respond to Breaches 84% Faster

We can act on threats immediately with automated response and pivot from detection to forensics in a few clicks.

Overwatch Managed NDR Comprehensive Detection & Response Simplified

The Overwatch Managed NDR service is comprehensive, delivering threat detection and response across hybrid environments.

Automated Inventory

Overwatch Managed NDR keeps an always up-to-date inventory through auto-discovery and classification of everything communicating on the network.

Peer Group Detection

By automatically categorizing devices into precise peer groups, Overwatch Managed NDR can spot strange behavior with minimal false positives.

Automated Investigation

Overwatch Managed NDR enriches every detection with content, risk scoring, attack background and expert-guided next steps to enable confident response.

Cloud-Scale Machine Learning

With cloud-scale machine learning and predictive modeling drawing upon 5,000+ L2-L7 features, Overwatch Managed NDR detects, prioritizes and contextualizes threats against your critical assets.

Perfect Forward Secrecy Decryption

Overwatch Managed NDR decrypts SSL/TLS 1.3 with PFS passively and in real time so you can detect threats hiding in your own encrypted traffic.

Confident Response Orchestration

Overwatch Managed NDR handles detection and investigation while powerful integrations with solutions like Phantom and Palo Alto enable augmented and automated response workflows.

Cybersecurity, Simplified

Overwatch Managed NDR is part of High Wire Networks' Overwatch Managed Security Platform-as-a-Service, which offers organizations end-to-end protection for networks, data, endpoints and users. With one affordable monthly subscription and a security appliance at every location, you can take advantages of these key features:

 24/7 Security Operations Center with Open XDR Platform	 Zero Trust Remote Access	 Security Awareness Training	 Managed Firewall
 Continuous Vulnerability Assessments	 Intelligent Video Surveillance	 Real-Time Patch Management	 Multi-factor Authentication

Overwatch also delivers the critical benefits your organization needs:

-  Integrated, Best-of-Breed Solutions
-  Threat Detection, Blocking & Elimination
-  Data Sovereignty
-  Scalable & Future-proof Architecture
-  Continuous Compliance
-  Predictable Costs & No Capital Outlay
-  24/7 Protection & Response
-  On-demand Reports & Dashboards
